## **DETAILED ACTION**

### ***Response to Amendment***

1. This in response to and RCE filed 10/31/2007. No claims have been added. No further claims have been canceled. Claims 1-2, 15-16, 21 and 24 have been amended. Claims 1-2, 15-16, 21 and 24 are still pending in this application.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2 and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

For the limitation "by the calling subscriber" as recited in claims 1, 2 and 21, the Examiner failed to find the proper support for the above limitation in the specification. Applicant is required to point out to the specific part of the specification that provides clear support for this limitation.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 2, 15, 16, 21 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fox (U.S Patent No. 6,363,143) in view of Osman et al. (U.S Patent No 5,920,614).

Fox limitations and features are already addressed and presented in the previous office action (Final- action submitted and mailed 07/06/2007).

However, in regard to the limitations of “selecting, by the calling party” (as recited in claims 1, 2 and 21), “selecting, at the calling terminal” (as recited in claims 15 and 16) and “select, by the first subscriber” (as recited in claim 24), Fox does not teach clearly the fact of providing information related to the called party (the person who is being called) and have these information available to the calling party.

Nevertheless, Osman et al. teach a method for providing information to a caller about the subscriber (called party). For example, Osman discloses the information can be the present physical location of a subscriber with a telephone number (see abstract and col. 2, lines 8-13).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the feature of providing the calling subscriber about information related to other services that the called party subscriber too, as taught by Osman, into the Fox system in order to provide the calling party with more flexibility and diversity while handling calls or communicating with the called party. When the calling party informed that the called subscriber at this moment in certain geographical location he/she can have the option of reaching the called party at this current location or not.

### ***Response to Arguments***

5. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
